Introduction/Business Problem

Let say if you are a buisiness manerger who want to invest a Indian food restaruant in a mid-
size city which has fast growth. You have to decide where or which neighberhoods to open the restaruant. In order to answer this question, you maty need a model get some recommendations where to start your business.

Therefore, we will base our model on a mature city/metropolitan city. Because your city will also become a metropolis some day.
